

Innovations and Advancements in Point-of-Care Blood Gas Testing

We invite you to attend this virtual educational workshop. Our speakers will focus on how to achieve a patient-centered approach to point-of-care blood gas testing, risk-management strategies, and the latest innovations in quality management.

Date

April 7, 2022

Time*

11:00 AM–1:00 PM ET

7:00 PM–9:00 PM ET

[REGISTER NOW](#) 

James O. Westgard, PhD, FACB

Professor Emeritus, Pathology and Laboratory Medicine,
University of Wisconsin-Madison;
Director of Quality Management,
University of Wisconsin Hospital and Clinics;
President, Westgard QC
Madison, WI

James H. Nichols, PhD, DABCC, FAACC

Professor of Pathology, Microbiology and Immunology Medical
Director, Clinical Chemistry and POCT,
Vanderbilt University Medical Center,
Nashville, TN

Objectives

- Discuss sources of error in the medical laboratory, and strategies to control and mitigate
- Review optimal strategies to achieve higher standards in quality
- Identify strategies to address the risks of variability in sample collection, for enhanced patient safety
- Review the evolution of next-generation quality management and how it can help achieve higher quality in blood gas testing
- Review the history of quality control (QC), including novel Patient-Based Real-Time QC
- Expert roundtable discussion will be included

*Participants are only required to attend one session.
